SUBJECT INDEX, VOLUME 7

Acrylonitrile-conjugated diene, alternating copolymers, preparation of, in the presence of metal halides, 443
Adsorption, polymer, studies by gel permeation chromatography, 529
Asymmetric polyamides, stereoregular, optical rotatory properties of, 219
Binary mixtures, polymers, existence of two theta points, 335
Biopolymer, terpolymeric, sequence distribution in, 313
Bisphenol-A polycarbonate-poly(dimethylsiloxane) copolymers, mechanical and optical studies of, 579
Block copolymers, styrene-butadiene, statistical thermodynamics of, 785
Butadiene-styrene, block copolymers, statistical thermodynamics of, 785
Chromatography, vacancy permeation, 781
Compaction, membrane, a theoretical and experimental explanation, 685
Compositional parameters, NMR investigation of, in methyl methacrylate-methacrylic acid copolymers, 661
Conformation, chain, of the high temperature polymorph of trans-1,4-polybutadiene, 211
Copolymerization, cationic, cyclic dimer of styrene oxide in, 621
Copolymers, block, styrene-butadiene, statistical thermodynamics of, 785
Copolymers, graft, butadiene-vinylaromatic, 141
Copolymers, methyl methacrylate-methacrylic acid, complete triad assignment in the NMR spectra of, 727
Crazing, solvent, of polystyrene, effect of polymer molecular weight on, 679
Crosslinking agents, cationic, Co γ-irradiated, ESR of, 507
Crystal mats, polyethylene single, effect of filtration conditions on the apparent density of the intercrystalline layers of, 307
Crystal mats, polyethylene single, oxidation of by fuming nitric acid, 27
Crystals, polyethylene, irradiated, enthalpy of fusion of, 651
Crystals, poly(trans-1,4-butadiene), chain folding in, 755
Cyclopentene-acrylonitrile, copolymerizations, penultimate effect in, 31
Cyclotriphosphazene, hexachloro, effect of sulfur on the polymerization of, 743
Distribution, molecular weight, of polyacrylonitrile carrying pendant sulfonate groups, 343
Distributions, molecular weight, bimodal, in the γ-radiation induced polymerization of styrene at low temperature, 713
ESR, in the study of the behavior of peroxy radicals trapped in γ-irradiated polypropylene, 91
ESR, of Co γ-irradiated cationic

crosslinking agents, 507
ESR, spectrum, of gamma-irradiated polystyrene, 587
Films, polyalkylmethacrylate, as matrices for photochromic studies, 719
Films, polyvinyl alcohol, spherulitic, from concentrated polyol solutions, 761
Folding, chain, in poly(trans-1,4-butadiene), crystals, 755
Formaldehyde-toluene resin, estimation of plastifying abilities of, 705
Fusion, enthalpy of, of irradiated polyethylene crystals, 651
Graft copolymers, butadiene, elastomeric graft copolymers, 141
Interface, graphon-liquid, competitive adsorption of polymers at, 495
"Living" oligomers, of polyisoprene, NMR of, 821
Loss transitions, secondary, in antiplasticized polymers, 35
Mechanical studies, and optical of poly(dimethylsiloxane) bisphenol-A polycarbonate copolymers, 579
Methacrylic acid-methyl methacrylate copolymers, complete triad assignment in the NMR spectra of, 727
Methacrylic acid-methyl methacrylate copolymers, compositional and configurational parameters, NMR investigation of, 661
Modulus, Young's of poly(ethylene glycol), 65
Moiré techniques, holographique, in observation of polymer stress relaxation, 467
Morphology, surface, in semicrystalline polymers, 301
Network, elastomeric, topologically interpenetrating, 775
Networks, polyelectrolyte, cryodegradation of, 609
NMR, high resolution in determination of the tacticity of poly(vinyl chloride), 103
NMR, of poly(t-butylethylene oxide-2-D), 803
Oligomers, "living" of polyisoprene, NMR of, 821
Peptide, vinyl monomers, synthesis of, 597
Polyamides, stereoregular asymmetric, optical rotatory properties of, 219
Polyamides, stereoregular, derived from 1,3-trans-cyclohexanedicarboxylic acid, optical rotatory properties of, 225
Polydimethylsiloxane-silica composites, effect of Filler surface energy on the T_g, 237
Polyesters, terephthalate, photolysis of, 7
Polymerization, anionic, of styrene in tetrahydrofuran, reaction mechanism of, 885
Polymerization, cationic, of vinyl and alkenyl ethers, 23
Polymerization, electrochemical, of tetrahydrofuran, 625
Polymerization, radiation, of adsorbed furan molecules, effect of surface concentration on, 635
Polymerization, solid state, at liquid helium temperature, 375
Polymerization, stereospecific, of butadiene in the presence of *π*-allyl nickel halogenoacetates, 111
Polymerization, stereospecific, of propylene oxide by N,N-bis-(ethylzinc)-t-butylamine, 769
Polymers, amorphous, transport of organic micromolecules in, 405

Polymers, block, of dimethylsiloxane and bisphenol-A carbonate, synthesis and properties of, 569
Polymers, glassy, local order in, 51
Polymers, ladder, containing heterocyclic units of different structure, 749
Polymers, semicrystalline, surface morphology in, 301
Polymers, thermally stable, strong and dense, by reactive hot pressing of solid organic monomers, 437
Polystyrene, "monodisperse," supercritical fluid chromatography of, 811
Poly(tert-Butyl esters), tactic, film balance studies, 871
Polyurethanes, N-grafted, transition temperatures of, 215
Polyvinyl alcohol films, spherulitic, from concentrated polyol solutions, 761
Poly(vinyl chloride), tacticity of, studied by NMR, 103
Propionaldehyde, α,β-dichloro, polymerization of, 739
Radicals, peroxy, trapped in γ-irradiated polypropylene, behavior of, as studied by ESR, 91
Radiolysis, paraffin, on the products of, 241
Refractometry, differential, in mixed solvents, determination of the composition of copolymers by, 825
Relaxation, dielectric, anisotropy of, in oxidized low density polyethylene, 353
Relaxation, dielectric, of poly(vinylidene fluoride), 59
Resin, Toluene-formaldehyde, estimation of plastifying abilities of, 705
Scattering, coherent neutron, by polymer solutions at intermediate concentrations, 865
Sodium methoxide-cupric chloride system, polymerization of halophenol by, 709
Sorption, water, effect of, on bulk Nylon-6, as determined by x-ray crystallinity, 629
Stress relaxation, polymer, observation of, by holographic Moiré techniques, 467
Tacticity, of poly(vinyl chloride), studied by NMR, 103
Temperatures, transition, of N-grafted polyurethanes, 215
Tetrahydrofuran, 3-methyl, polymerizability of, 643
Transitions, glass, in polymer crystals prepared from dilute solution, 255
Transitions, secondary loss, in antiplasticized polymers, 35
Transition temperature, glass, of silicapolydimethylsiloxane composites, effect of Filler surface energy on, 237
Tropylium salts, polymerization of isoprene initiated by, solvent effect in, 455
Vinylaromatic-butadiene, elastomeric graft copolymers, 141
Vinyl ethers, cationic polymerization of, 23
X-ray crystallinity, in the determination of the effect of water sorption on bulk Nylon-6, 629
